## SECTION 5: Fire-fighting measures

### 5.1 Suitable extinguishing media

Water spray, fog, carbon dioxide (CO<sub>2</sub>), alcohol-resistant foam, dry chemical, or sand.

### 5.2 Specific hazards arising from the chemical

Highly flammable liquid and vapor. Vapors are heavier than air and may travel considerable distance to an ignition source and flash

back to source of vapors. Not likely to occur in package form.

Explosion Hazard: May form flammable/explosive vapor-air mixture. Not likely to occur in packaged form.

Hazardous combustion products: Oxides of carbon.

### 5.3 Special protective actions for fire-fighters

Protective actions during firefighting:

Fight fire from safe distance or protected location. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk.

Special protective equipment for firefighters:

Standard Firefighter's clothing including helmets, protective boots and gloves will provide a basic level of protection for chemical incidents. Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing

---

## SECTION 6: Accidental release measures

### 6.1 Personal precautions, protective equipment and emergency procedures

Personal Precautions: Ensure suitable respiratory protection is worn during removal of spills in confined areas.
